MITRASY

ABBASY MITRA UTAMA. PT
Company Profile

About Us

Mitrasy is an Indonesian professional services company that helped organizations to obtain sustainable competitive advantage through the adoption of innovative technologies and top enterprise solutions.

We offer methodology, custom training, technology building, and deep industry knowledge for cloud enablement, cloud-native application, microservices and application re-platforming for legacy system.

We develop and implement custom software solutions tailored to your business needs, as well as focus on automating the existing workflows and facilitating data management.

Why Mitrasy

Software Product Development
Mitrasy with reliable team of software engineers delivers cutting-edge software solutions on top of .NET Core, NodeJS, Java and Spring Stack, Golang as a backend and support following technologies for frond end: React, VueJS, Angular, employing high-level development practices of cloud automation, modern software development and implement OWASP principle.

Cloud Enablement and Cloud-Native Development
Mitrasy provides a team of certified cloud architects, administrators, and DevOps engineers to implement, automate, and manage private and hybrid clouds to make your IT infrastructure more flexible and scalable.

PoC to MVP Development for Startups
Mitrasy help companies to validate whether the chosen solution serves their core business needs. To get early feedback from end-users and prove feasibility, we offer a quick POC and MVP creation. Let's grow your idea into a successful and stable product!

Legacy App Modernization and Re-platforming
Mitrasy performs the shift from legacy apps to a cloud-based microservices architecture with minimum or zero downtime while ensuring scalability and resilience.

Our Services

Cloud Enablement and Cloud-Native Application
Mitrasy always focused on enabling companies to shift from outdated systems to the top-notch cloud-native solutions. Since the inception of cloud-native development, we've been helping businesses to build and continuously deliver scalable, resilient, and robust software in automated cloud environments.

Kubernetes
Mitrasy delivers full-scale Kubernetes solutions for enterprises, enabling them with resilient and highly available deployments. Boost your agility with a cost-efficient container orchestrator.

Custom Software
We develop and implement custom software solutions tailored to your business needs, as well as focus on automating the existing workflows and facilitating data management.

DevOps
Every software-led business today has CI/CD tools on its radar. Benefit from shipping new enterprise-grade features and updates faster with robust continuous integration and continuous delivery services.

Web And Mobile Development
With many successfully delivered projects for companies across industries, we integrate tailored user experiences through web and mobile software development.

Our Product

PORIS DXP- Experience Platform, CMS and DAM

Experience platform provides multichannel delivery and support for the ability to offer great experiences across various channels, devices and touchpoints. REST APIs provide further ability to integrate other methods of delivery and support a range of applications and other systems.

With headless CMS feature new generation of REST APIs helps developers consume content from any channel they need including mobile apps, kiosk, chatbots or wearables. Front-end developers are free to create a presentation layer using the technologies they commonly use.

PORIS Experience Commerce - B2B and B2C Commerce

Headless commerce decouples the front end from the ecommerce platform that powers it, allowing developers to build flexible and content-rich storefronts. Experience commerce provides APIs for the Catalog, Cart, Checkout, Orders, and Payments. The APIs can be plugged into an existing CMS or website for flexible content management.

PORIS Activa - Loyalty and Retention Management

Maintain users from to keep using our service is quite tricky in real case, with Amira loyalty and retention management we can setup rule-based activities to getting loyalty and integrate with existing app.

PORIS Teliva- Retargeting Push Notification and User Engagement

Web Push Notifications offer all the value of a banner along with the tailoring/segmentation value of a remarketing email. Unlike a remarketing email, they are, like banners, browser based, so they don't suffer from such problems as spam filters or inbox inertia. Once someone has subscribed to receive your pushes, they can be sent to them wherever they are on the web or mobile at any time of the day.
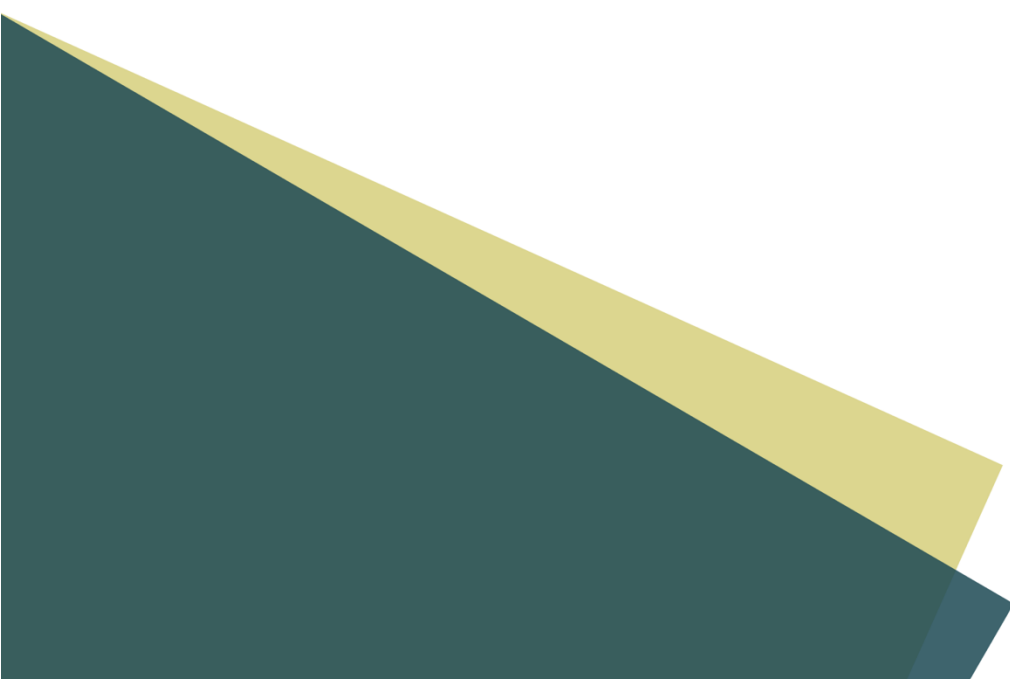

And better still, they can be segmented so that they fit the profile of each potential or returning customer, making them more effective than banners. Pion is one of the ready solution tailored for engage user to keeping our user back use our services.

Training

Microservices Architecture, Best Practices, Tools, Frameworks (Golang based)

Logging and Monitoring in Microservices Architecture

Our Clients

BXc Privilege, Subcon
